ELENA VOLKOV

London, UK | elena.volkov@example.com | github.com/evolkov
Staff Software Engineer | Distributed Systems

SUMMARY

Staff engineer specializing in high-throughput, low-latency data platforms. Writes about reliability and mentors senior ICs.

EXPERIENCE

Staff Software Engineer - GlobalPay, London

2021 - Present

- Architected ledger service handling 450k TPS with a five-nines availability target.
- Drove org-wide SLO program; reduced customer-impacting incidents 40% YoY.
- Published an internal RFC process adopted by 12 teams.
- Mentored 6 senior engineers; 3 were promoted to staff in the following cycle.

Senior Software Engineer - NeoBank, London

2016 - 2021

- Built event-sourcing platform for core accounts used by 4.2M customers.
- Cut reconciliation lag from 6 hours to 12 minutes by redesigning the consumer topology.

TALKS

- SLOs That Engineers Trust - PlatformConf 2024
- Internal talk series on load-shedding, attended by 180 engineers.

EDUCATION

Imperial College London - MEng Computing

SKILLS

Java, Kafka, Cassandra, distributed systems, technical leadership, incident command
