JORDAN LEE

Boston, MA | jordan.lee@example.edu | github.com/jordanlee-cs
Software Engineering Intern | Seeking Summer 2026 Backend Internship

SUMMARY

CS junior who ships small production changes and writes the tests that keep them from breaking. Comfortable with Node APIs, SQL, and explaining a bug before proposing a fix.

EXPERIENCE

Software Engineering Intern - Northwind Labs, Boston, MA

Jun 2025 - Aug 2025

- Shipped a Node checkout webhook handler and added 14 integration tests.
- Fixed 12 payment edge-case bugs in the billing service (timeouts, duplicate events).
- Wrote a local Stripe test-mode runbook used by the next intern on day one.
- Pair-programmed on a Redis cache for catalog reads; p95 dropped on the staging replica.

Student Technician - Campus IT, Northeastern University

Sep 2024 - Present

- Imaged and reset 200+ student laptops per semester.
- Documented Wi-Fi onboarding FAQs; fewer repeat tickets after the guide shipped.
- Staffed the walk-up desk 8 hours/week during the academic year.

PROJECTS

DormSwap - campus marketplace (Express, PostgreSQL, React)

- Session auth, listing CRUD, and image uploads for a closed beta of 80 students.
- Added basic rate limiting after a scrape attempt during finals week.

CourseTrack - personal grade tracker (Python, SQLite)

- Parses syllabus PDFs and stores assignment dates. Used by 6 classmates.

EDUCATION

Northeastern University - B.S. Computer Science (expected 2026)

Coursework: Algorithms, Databases, Networks, Software Engineering

GPA: 3.6 / 4.0

SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Tools: Node.js, React, PostgreSQL, Redis, Git, Jest, Docker (basics)
